## STP-TLM200 Surface metal traffic light

This traffic light indicator is ideal for providing a visual indication as to the door's 'locked/unlocked' status. A control signal is required from the lock to change the red/green LED indication.

### Features

- Surface mount only
- Metal faceplate and back-box
- Separate red and green LEDs with large lenses.
- Used as a visual indication whether door is locked or unlocked
- 'Stable' or 'Flashing' LED operation (selectable via jumper)

### Technical Information

- Input voltage: 12-24Vdc
- Current draw:  
40mA @ 12Vdc / 80mA @ 24Vdc
